

Welcome to the wonderful world of advanced placement biology. It is highly recommended that you try to attend one or more of the summer AP readiness seminars. See the summer class bulletin. While the summer is a time for rest and recreation, it is to your advantage to do this assignment BEFORE school starts. Procrastination is your enemy.

Your summer assignment is due by 7:30 am on **Monday, September 17, 2018**. To access the assignment, follow directions below.

## AP Biology 2018-19

To join:

1. Go to [www.ck12.org](http://www.ck12.org)
2. Click Join to create an account and write down your account information.
3. Click Groups.
4. Click Join a Group.
5. Enter code: vs08g

You can also join the class by using this link:

<https://www.ck12.org/join/group/?accessCode=vs08g>

On the group page is an assignment section. There are assigned units for you to complete.

Introduction to Biology  
Ecology Unit along with simulations

For each unit, follow the guided lessons including readings, videos, animations, study guides, practice, and practice quizzes. You will need to complete all of the practice sections, one per topic within each unit. The practice section is an untimed session, shows your progress, and can show hints for you. When finished with reviewing the material, you will complete the assigned quiz. These have limited times and allow for only **one** try per question. I will NOT reset your tries so complete the quiz in one session. There are a total of 6 quizzes between the two units that you must complete and can be completed in any order. Do not stop in the middle of a quiz and remember to hit "submit". If you prefer, there is an app for CK12.

If you have any questions please email me:
