CONSOLIDATED SCHOOL DISTRICT OF NEW BRITAIN
TUBERCULOSIS SCREENING

Name: _____

Date of Birth: _____

This screening is about tuberculosis. Tuberculosis (TB) is a disease caused by TB germs and is usually transmitted by a person with active TB lung disease. It is spread to another person by coughing or sneezing TB germs into the air.

Adults who have active TB disease usually have many of the following symptoms: cough for more than two weeks duration, loss of appetite, weight loss of ten or more pounds over a short period of time, fever, chills, and night sweats.

A person can have TB germs in his or her body but not have active TB disease (this is called latent TB infection or LTBI)

Tuberculosis is preventable and treatable. TB skin testing (often called the PPD or Mantoux test) is used to see if you have been infected with TB germs. No vaccine is recommended for use in the United States to prevent tuberculosis. The skin test is not a vaccination against TB.

The purpose of this screening is to find out if you may have been exposed to tuberculosis.

Place a mark in the appropriate box:	Yes	No	Comments
TB can cause fever of long duration, unexplained weight lost, a bad cough (lasting over two weeks), or coughing up blood. As far as you know: <ul style="list-style-type: none"> • Have you been around anyone with any of these symptoms or problems? or • Have you had any of these symptoms or problems? or • Have you been around anyone sick with TB? 			
Were you born in another country? If so which one? _____ (see attached list)			
Have you traveled in the past year to another country for longer than 3 weeks? If so, specify which country/countries? _____ (see attached list)			
Have you ever been an intravenous (IV) drug user, in jail or prison, or lived in a shelter? And, to the best of your knowledge, have you spent longer than 3 weeks with anyone who is or has been an intravenous (IV) drug user, HIV-infected, in jail or prison, or who recently came to the United States from another country (specify country _____)			

Have you ever had a positive TB skin test? Yes ___ (if yes, specify date ___/___) No ___

If you answered yes to any of the above questions, you will need to have a TB skin test (or chest x-ray) with a negative result before starting work.
